REMax OF GREAT FALLS

Evidence of “high design” shows throughout our Canyon plan. How do you keep clutter out of the kitchen? With a “drop zone”—located just off the entries, it’s the perfect place for a recharging station for cell phones, music players and net-book computers, as well as a place to sort the mail, keep car keys, umbrellas, etc. There’s a handsome display niche just beyond the front entry, cathedral ceiling unifying the entertaining areas and an oversized garage perfect for extra storage.

You’ll love having the master bedroom secluded from other household activities. And there’s two master bath layouts—one with a tub + shower and the other with an oversized shower and more storage. There’s also an angled peninsula kitchen layout with extra storage and a family-sized eating bar. And with all those windows across the back, the Canyon embodies the “light, bright and airy” design goals!
