Thoughtful touches abound in our new Missouri design. Take the humble laundry room, for example. A window in the laundry is truly welcome, whether you're trying to separate dark colors or just for fresh air. A counter makes folding laundry less of a chore, while the space under that counter is great for laundry basket storage. Speaking of storage, it's everywhere in the Missouri—the oversized garage, a deep coat closet near the master bedroom, even loft-type areas for the secondary bedrooms!

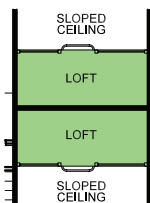

The master bedroom is located for privacy—just the thing when you want to relax. And when you're ready to socialize, the family room, eating area and kitchen flow nicely. The lower level opens up yet another opportunity for entertaining, whether your tastes are more towards a large game room or perhaps a home theatre. Also, we offer an alternate master bath layout with soaking tub as well as an island kitchen option, so you can tailor the design around how you want your home to live.
