Livability at a Glance

entertaining de-stressing flexible living storage

Our new Rimrock plan has something for everyone! If you enjoy outdoor living, there's a great covered patio for lunch with friends or relaxing to nature's serenade. Looking for a workshop area? We've got you covered with the extra deep garage. Enjoy movie nights at your place? In addition to having a long wall space for your widescreen TV, we've planned for space in the entry closet for all of your audio and electronic gear, meaning you won't have to decorate around an entertainment center!

The bedroom wing was designed to accommodate everyone. For example, there's three linen closets and nice-sized secondary bedrooms. The master bath is accessed via a pocket door plus the master suite has two walk-in closets! And while we're looking at storage, did you see the kitchen pantry? That's our solution for storing prepared foods and small appliances like a Kitchenaid mixer and George Foreman grill, freeing up precious cabinet storage for other items.
